

DONE-FOR-YOU GROWTH SYSTEMS

Stop losing good leads.

Ember Bots helps service businesses turn missed calls, slow follow-up, and inconsistent customer response into more booked jobs and measurable revenue.

What we sell

- ◆ Missed Revenue Snapshot to expose the leaks
- ◆ Lead Recovery & Response System to fix them
- ◆ Ongoing optimization to improve revenue capture over time

Most service businesses do not have a lead problem. They have a **follow-up problem.**

Leads leak when

- ◆ calls are missed or answered too slowly
- ◆ web forms sit too long without response
- ◆ estimates are not followed up consistently
- ◆ after-hours inquiries have no capture path

Businesses spend money to generate demand, then lose revenue in the handoff.

More leads do not fix a **broken response system.**

When front-office execution and follow-up are inconsistent, owners lose visibility, teams drop opportunities, and marketing gets blamed for operational leakage.

Cold

Good prospects go cold before booking

Chaos

Staff attention gets pulled into daily fire-fighting

Waste

Ad spend and referrals underperform because response breaks down

Blind spots

Owners cannot trust every opportunity is being worked correctly

We build and operate the **follow-up engine** for your business.

- ◆ respond faster to inbound leads
- ◆ follow up more consistently
- ◆ recover missed opportunities
- ◆ convert more existing demand into booked revenue

POSITIONING

We do not sell software shelfware.

We deliver an operating system for lead recovery and response.

A simple path from diagnosis to **growth**.

1

Missed Revenue Snapshot

We review your public customer journey and identify where leads may be leaking before they turn into booked work.

2

Lead Recovery & Response System

We implement workflows that tighten response speed, estimate follow-up, and customer communication.

3

Ongoing Optimization

We monitor, refine, and improve the system so performance gets better over time.

We focus on **revenue capture**, not vanity marketing.

Most agencies sell traffic. Most tools sell complexity. Ember
Bots sells outcomes.

Faster

Lead response without adding office overhead

More consistent

Follow-up that does not depend on memory

Higher ROI

Better use of existing ad spend and referrals

Clearer pipeline

A cleaner path from inquiry to booked job

Who Ember Bots is built for **first**.

- ◆ local service businesses
- ◆ owner-led or tightly managed operators
- ◆ teams already getting calls, forms, and estimate requests
- ◆ businesses strong at service delivery but inconsistent in follow-up

STRONGEST INITIAL WEDGE

HVAC, plumbing, and other home-service businesses where missed opportunities are already costing revenue.

Practical, specific, and built around **real operational gaps**.

Ember Bots is different because we

- ◆ start with specific evidence, not generic AI hype
- ◆ focus on the buying path, not abstract automation claims
- ◆ build around actual business workflows
- ◆ combine strategy, implementation, and ongoing management

No fluff. No bloated stack. No “AI for everything” nonsense.

Simple packages built around **growth stage.**

STARTER

\$1,500

setup · \$750/mo ongoing

- ◆ basic lead follow-up
- ◆ review workflow support
- ◆ best as a downsell

GROWTH

\$2,500

setup · \$1,250/mo ongoing

- ◆ best-fit package for serious operators
- ◆ response, follow-up, conversion support
- ◆ recommended default offer

Start with a Missed Revenue Snapshot.

If you are already generating demand but are not confident every lead is being worked correctly, this is the fastest place to start.

- ◆ where leads may be slowing down
- ◆ where follow-up is likely breaking
- ◆ what the first fix should be
- ◆ whether Ember Bots is the right fit to solve it
